

## Lisa Price

Lisa graduated from the College of William and Mary with a BS in geology and authored her undergraduate thesis "*Geologic and Groundwater Study of the Springfield Road Landfill, Henrico County, Virginia.*" She worked as a field geologist for Schnabel Engineering, a geotechnical engineering firm specializing in subsurface investigations. Lisa joined EPA in the Region 3 office as a federal On-Scene Coordinator in 1987 and then transferred to Region 6 as a Remedial Project Manager in 1989. Her career with EPA has been primarily in the Superfund program, being responsible for investigations and remedy selections on NPL and BRAC sites. Lisa became the Grants Mining District Coordinator in June 2010 and was responsible for coordinating with other federal, state and tribal partners, and for overseeing and implementing investigations on legacy uranium mines in New Mexico. Lisa returned to the Grants Mining District Coordinator position in October 2014 after being the Lead Region Coordinator for the Superfund Program from 2012 to 2014.
